Nikita Mart
Full Stack Web Developer

@ nikitamart49@gmail.com • https://www.linkedin.com/in/nikita-mart-880028392 📍 Kamyanske, Ukraine

SUMMARY

Front-End Developer specializing in designing and building responsive, interactive, and high-performance web and game interfaces using React, Vue.js, Next.js, HTML5, CSS3, and JavaScript. Skilled in UI/UX design, Figma prototyping, animations, and 3D visualizations with Three.js, turning complex designs into seamless, user-friendly experiences. Experienced in leading international projects, collaborating across design and development teams, integrating APIs, and deploying robust applications on AWS Glue.

EXPERIENCE

Senior Frontend & UI/UX Developer
Sombra Inc

📅 08/2023 - Present 📍 Oblast, Ukraine

- Implemented server-side rendering and dynamic routing in Next.js to optimize performance for large-scale web applications. Developed interactive 3D product previews and complex animation workflows using Three.js. including real-time lighting, physics-based interactions, and device-optimized rendering for E-commerce and brand showcases.
- Engineered responsive, high-fidelity interfaces by integrating Three.js scenes with React components and state management, ensuring seamless interaction and minimal performance overhead. Collaborated with design teams to translate advanced 3D visual concepts into maintainable, production-ready code with precise animations and interactive elements.

Web Developer
QATestLab

📅 08/2020 - 06/2023 📍 Kyiv, Ukraine

- Developed E-commerce and marketplace platforms with dynamic product catalogs, shopping carts, and transactional systems, using React/Vue for responsive frontends and Node.js/Express with MongoDB/PostgreSQL for secure, high-performance backends. Integrated real-time inventory updates, search & filtering, and analytics pipelines (AWS Glue) to ensure seamless shopping experiences and reliable multi-tenant operations.
- Designed SaaS, social media, and CMS platforms with interactive dashboards, messaging systems, and content management features. Leveraged React/Vue for dynamic UIs, Node.js/Express for REST APIs, and hybrid data storage (MongoDB + PostgreSQL) to support real-time analytics, recommendation engines, and collaborative tools, creating scalable and data-driven applications tailored to each platform's needs.

Web Designer
Sloboda StudioSlo

📅 07/2019 - 07/2020 📍 Kharkiv, Ukraine

- Led the design of an E-commerce dashboard for a fashion retailer, translating Figma prototypes into a polished, user-centric interface that increased product discoverability and simplified the checkout process. Designed and optimized wireframes and layouts for a SaaS analytics platform, improving data visualization clarity and mobile responsiveness for over 10,000 active users.
- Established and enforced cohesive UI/UX standards for a content management system, including a reusable component library and interactive style guide, which streamlined future product updates. Collaborated with marketing teams to create visually compelling promotional banners and onboarding flows, enhancing user engagement and reducing bounce rates by measurable margins.

EDUCATION

Bachelor's Degree – Computer Science (Frontend Development Focus)
Vasyl Stefanyk Precarpathian National University

📅 2017 - 2021 📍 Ivano-Frankivsk, Ukraine

SKILLS

React	Next.js	Three.js	Vue.js	Webflow

API Design and Development	Game UI/UX Design	Animation	Figma

Node.js	ExpressJS	MongoDB	Poster	AWS Glue
